U S WEST Cellular guarantees the quality of your calls made on our cellular system. If a U S WEST Cellular call ever fails to meet your expectations, just call **\*611 SEND** from your cellular phone and we'll credit your account.

Since cellular phone calls are based on wireless radio communication, transmission and reception can be affected by terrain, atmospheric conditions, and local interference. But our Call Guarantee lets you get credit for U S WEST Cellular calls that don't meet your standards no matter what the reason within U S WEST Cellular systems.

# Preferred roaming rates in the Northwest Territory.

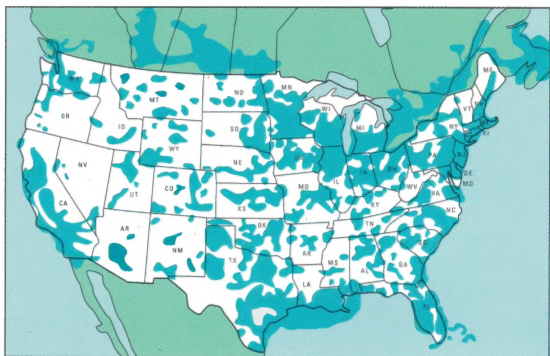

U S WEST Cellular has teamed up with other cellular providers in the area to offer Puget Sound area customers lower roaming rates in Washington, Oregon, Idaho, and Montana.

The Northwest Territory Cellular Service Net-

work lets you take advantage of preferred roaming rates of just 75¢ per minute and no access fee in Northwest Territory cities (the cities that are highlighted on the map). That's 30% to 40% less than previous roaming rates, depending on your usage.\*

\* Rates subject to change without notice.

Stay in touch while traveling across the United States and Canada—including Hawaii and Alaska.

As a U S WEST Cellular customer, you have access to cellular systems throughout North America. You can also enjoy our EasyRoaming® service at no extra charge. This convenient service lets people in your home area reach you when you travel to hundreds of cities in the U.S. and Canada simply by dialing your 7-digit cellular number.

EasyRoaming is completely automatic for your callers. Forget about providing them with your schedule and a list of complicated roaming access codes for each city you plan to visit. They just dial your cellular number and—presto—you're connected.

All you have to do to use EasyRoaming is activate it when you arrive in a city with EasyRoaming service. For details about EasyRoaming—or for answers to your other questions about roaming—call our Roaming Hotline at **\*711 SEND** from your cellular phone or **1-800-238-7848**.

EasyRoaming service is free, but calls forwarded from your home city to the city in which you are roaming are long distance. You are billed both roaming and long distance charges for these calls. Roaming airtime is usually more than your home cellular service rate, and you may be charged a daily access fee
